

LEMO

FACILITY GUIDE 2020

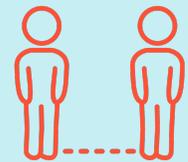

As we continue to navigate through this challenging time, there is one thing that remains our primary focus, maintaining the connectedness, stability, and growth mindset for our student-athletes. Top Ten Need to Know:

1. Complete the COVID 19 waiver before showing up to the facility.
2. When driving into the facility, **GO SLOW** and follow signs.
3. Student-athletes must check-in & check out at the front desk each time they enter/exit the facility.
4. Temperature checks via the forehead thermometer upon entry.
5. Use hand sanitizer when entering the facility, frequently throughout your visit, and when you exit.
6. Restrooms will be open to wash hands with soap and water and emergency bathroom use only.
7. Water stations are closed, bring your water bottle.
8. High-fives, shaking hands, unnecessary contact on pause.
9. If you or your student-athlete exhibits a fever, coughing, or any cold/flu symptoms, please stay home.
10. Be kind & considerate of others at all times.

Healthy & Clean
Wash hands regularly and for a minimum of 20 seconds.

Social Distance
Stay 6ft apart, masks when possible, cough and sneezing etiquette.

Sick?
Showing any signs of being sick, it's better to just stay home.
Thanks!

1

READY

**Waiver Signed.
Plan ahead.
Arrive Safe.**

2

SET

**Follow Signs at the
drop-off/pickup zone.
Students Only**

3

GO

**Enjoy your time
within the Facility!**

LEMO

FACILITY GUIDE 2020 - ENTERING & EXITING PROTOCOLS

Step 1: Complete Waiver.

Step 2: Arrive 15 prior to scheduled wave, masks on.

Step 3: Staff will ask student-athlete's first and last name, then completes a forehead temperature scan check.

Step 4: Student-athlete is then asked to stand on a social-distance 6 foot ground marking.

Step 5: Coach escorts social bubble (12) into the facility to designated space/court.

Step 6: Once wave concludes, coach will escort social bubble outside for pickup.

LEMO

FACILITY GUIDE 2020 - FREQUENTLY ASKED QUESTIONS

Q: How is the facility disinfected/sanitized?

A: We've introduced a two-hour operational wave (e.g., 9 AM, 11 AM, 1 PM, 3 PM, 5 PM, & 7 PM), whereas student-athletes enter the facility, perform, then exit. At the same time, the student-athletes exit the facility, every space is sanitized with an industrial spray sanitation solution. We spray ALL equipment disabling any bacteria and providing the healthiest environment for all student-athletes, staff, and personnel.

Outside of our daily wave maintenance schedule, we have an external service clean all common areas (e.g., bathroom, entrance, and exit, etc.)

Lastly, we've partnered with OXYPHOG via Hasset Ace Hardware. OXYPHOG is an industrial fog machine that, during a 12-hour cycle, removes all oxygen particles annihilating any surface bacteria. We've aligned our schedule with the length of every 3-week camp offering. Meaning, once one camp concludes, we schedule a 12-hour OXYPHOG session.

Q: How do you educate your staff on COVID 19 protocols?

A: All staff has been certified through an external service, NATEC International Service. Additionally, we have weekly staff meetings reviewing any new state and county guidelines.

Q: Can my student-athlete bring in food or backpacks?

A: Unfortunately we're asking no external food to be brought into the facility. Only water bottles and cell phone. No need to bring in backpacks, and keep things to a minimum.

Q: Are parents or family members allowed to watch or enter the facility?

A: We're only allowing student-athletes, coaches and staff within the facility.

LEMO

FACILITY GUIDE 2020 - FREQUENTLY ASKED QUESTIONS (CONT.)

Q: Do you require your student-athletes to wear face masks during their session?

A: Yes, Bay to Bay athletes will be required to wear a mask before, during, and after their training session.

Q: Do you have a ventilation system?

A: Yes, we have a ventilation system that continually exchanges internal air with external air.

Q: If someone on campus tests positive, what is the protocol?

If anyone has identified themselves as being in contact with someone that has been tested positive or communicates with us that they tested positive, we begin a process called Strategic Threat Breakdown. In our first step, we complete a LEMO incident Report (LIR), this triggers leadership to take a deep dive into understating the facts immediately. During our discovery session, IF it is confirmed that we need to initiate local and state contact tracing procedures and protocols, we begin immediately.

Q: How do you manage the number of student-athletes in the space at one time?

A: We follow state and county guidelines and have a maximum of a 12:1 student-athlete to coach ratio as well as have each bubble cohort within ~2000-3000 square foot space. This allows each student-athlete to occupy 153 to 230 personal square feet. The positive of occupying 43,050 square feet with 40-foot tall ceilings with air ventilation is space.
